PROJECT PRESENTATION

What Is This Website About?

A single place to explore the gym and connect with its team.

Explore the gym and connect with its team.

DISCOVER

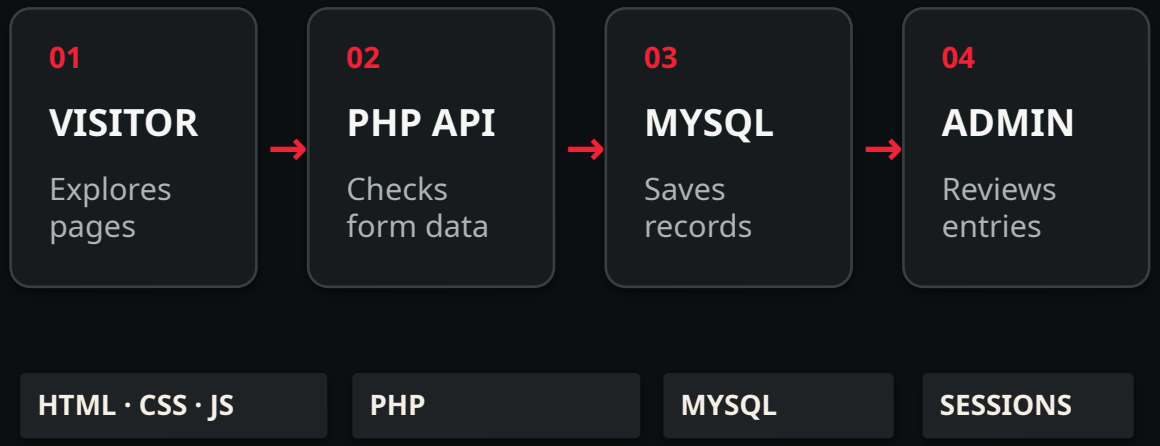

Programs, coaches, gallery and membership options.

ENQUIRE

Visitors can send contact and visit requests.

MANAGE

Staff can review enquiries and member feedback.

Why Did We Build This Website?

To make gym information easier to find and enquiries easier to manage.

INFORMATION GAP

Clear details about services, coaches and plans.

CONTACT FRICTION

A structured way to request a visit or share goals.

FEEDBACK VISIBILITY

One staff inbox for enquiries and reviews.

OUR SOLUTION

We brought gym details into one responsive website and connected forms to a PHP/MySQL workflow.

Homepage & Hero Slider

A strong first impression with clear navigation and calls to action.

NAVIGATION

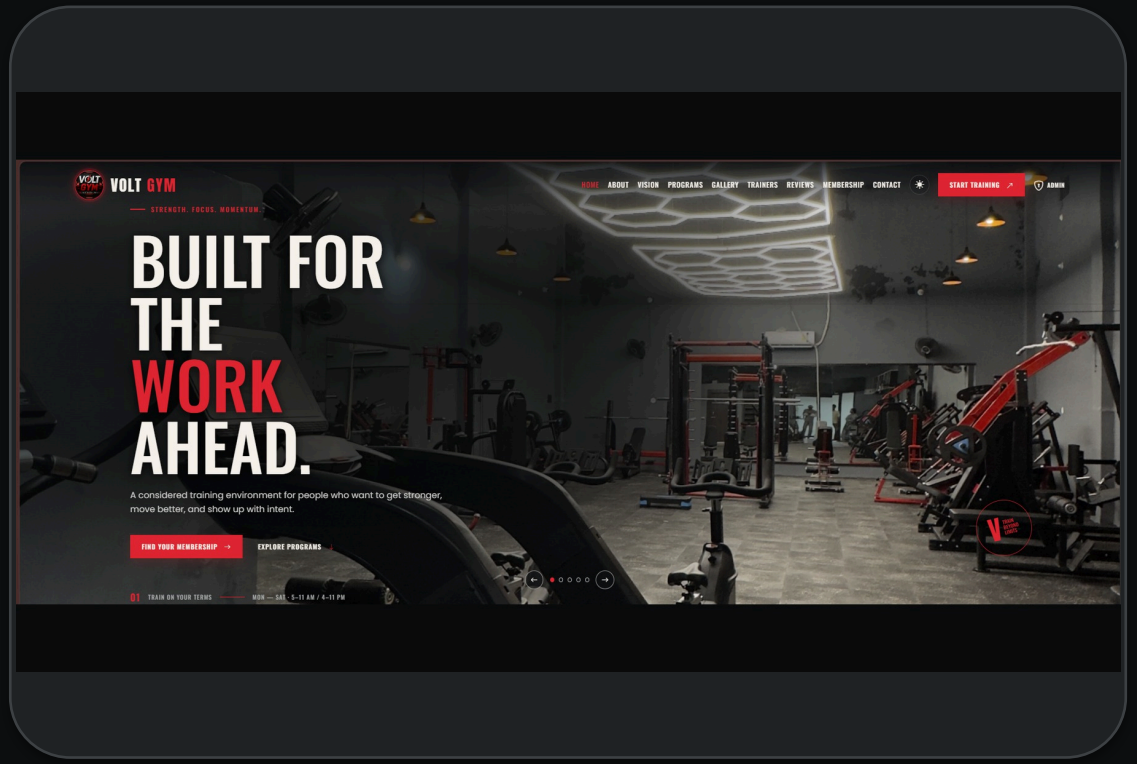

Links jump to the main sections of the page.

AUTOMATIC SLIDER

The featured background changes on a timer.

CONTROLS

Previous/next buttons and pagination dots let visitors navigate.

HTML: section · div · button · i

CSS: background images

JS: setInterval() · active class

About Volt Gym

Short, readable content introduces the training environment and brand purpose.

ABOUT

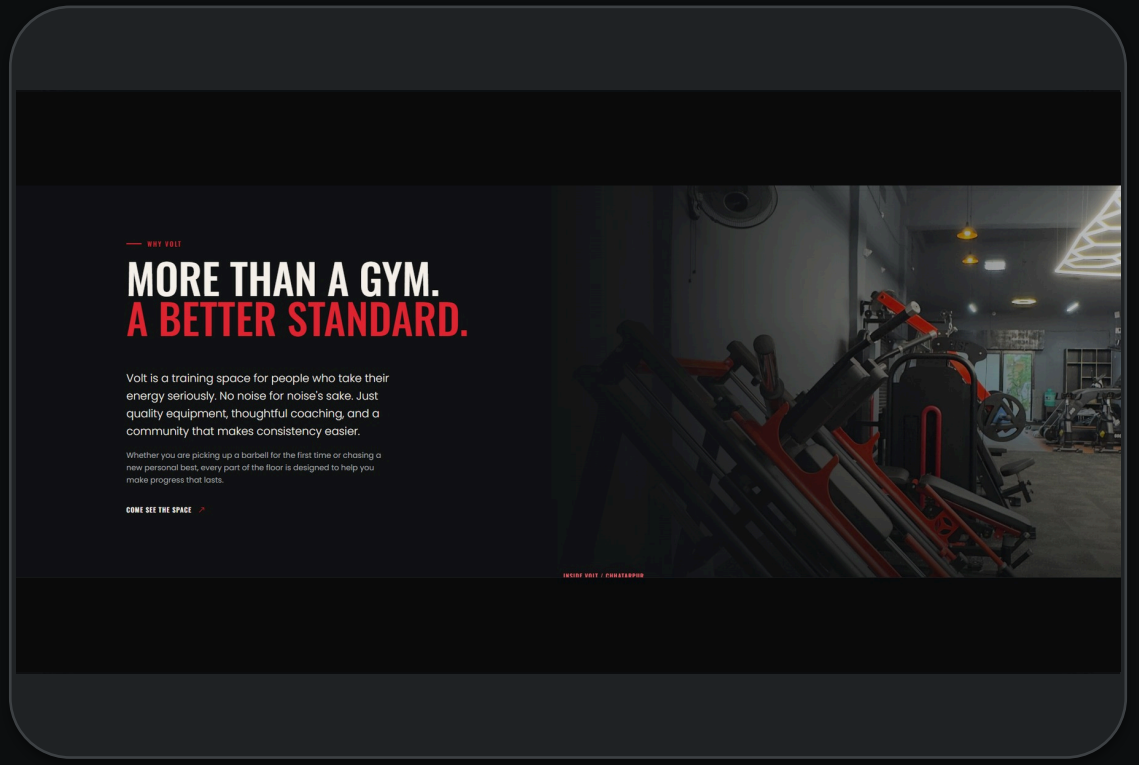

Explains the gym’s approach to training and consistency.

VISION

Make strength and movement part of everyday life.

MISSION

Pair coaching with a welcoming environment.

HTML: section · h2 · p · div

CSS: layout · typography

Vision & Mission

The gym’s purpose is presented as a quick, easy-to-scan story.

VISION

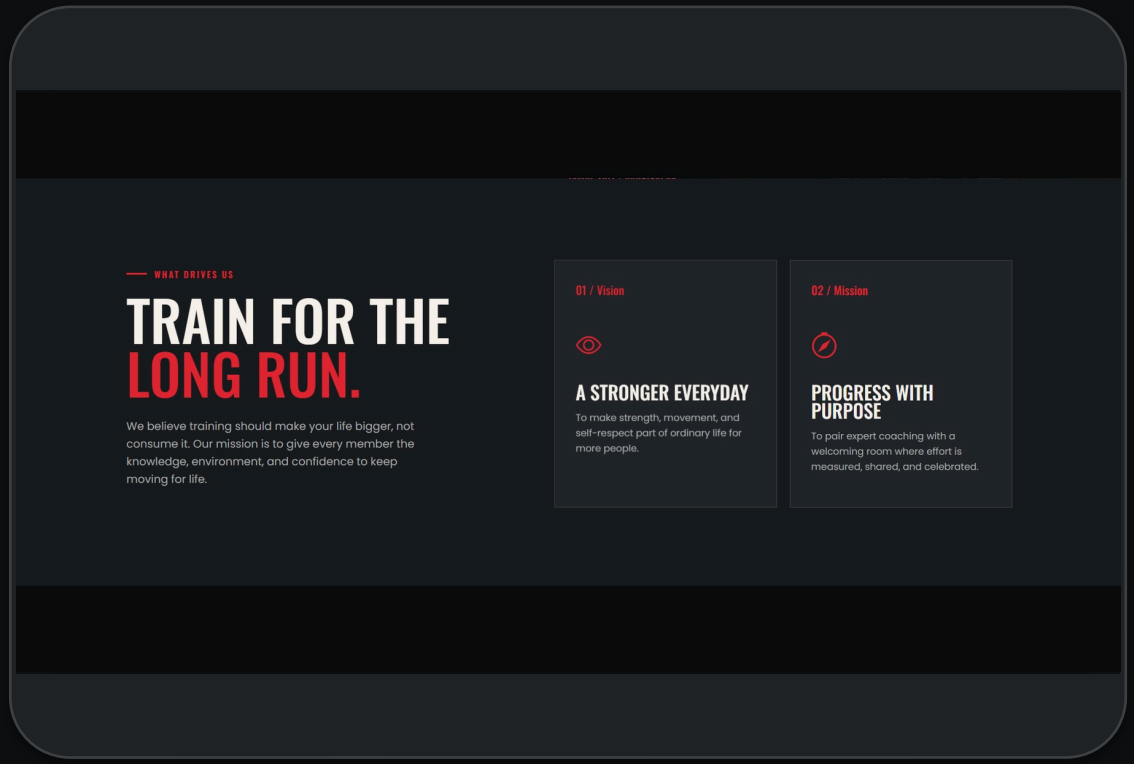

Make strength, movement and self-respect part of everyday life.

MISSION

Pair coaching with a welcoming space where progress is shared.

DESIGN CLUE

Short text blocks and paired content improve readability.

HTML: headings · paragraphs · containers

CSS: spacing · contrast

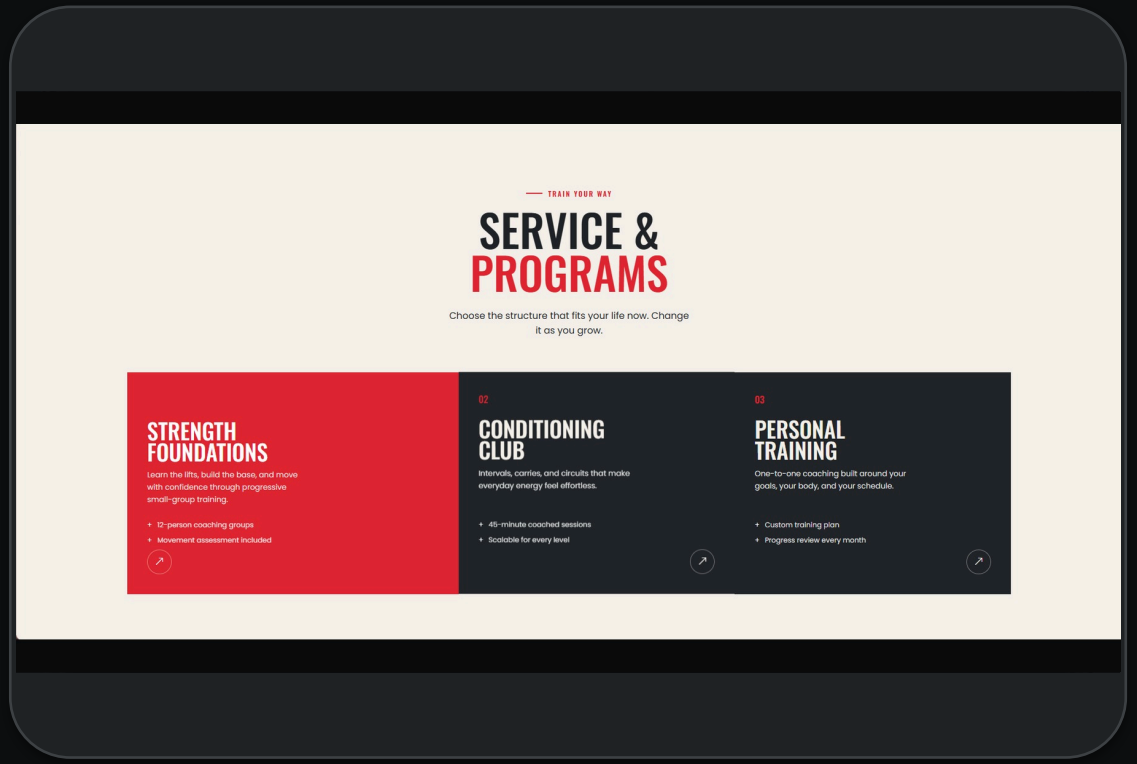

Training Programs

Three pathways help visitors find the kind of training that fits their goals.

STRENGTH FOUNDATIONS
Build lifting fundamentals and confidence.

CONDITIONING CLUB
Intervals, carries and circuits for everyday energy.

PERSONAL TRAINING
One-to-one coaching with a custom plan.

HTML: section · cards · headings

CSS: grid · card styling

Gallery & Image Lightbox

Gym photography helps visitors picture the space before they arrive.

GALLERY GRID

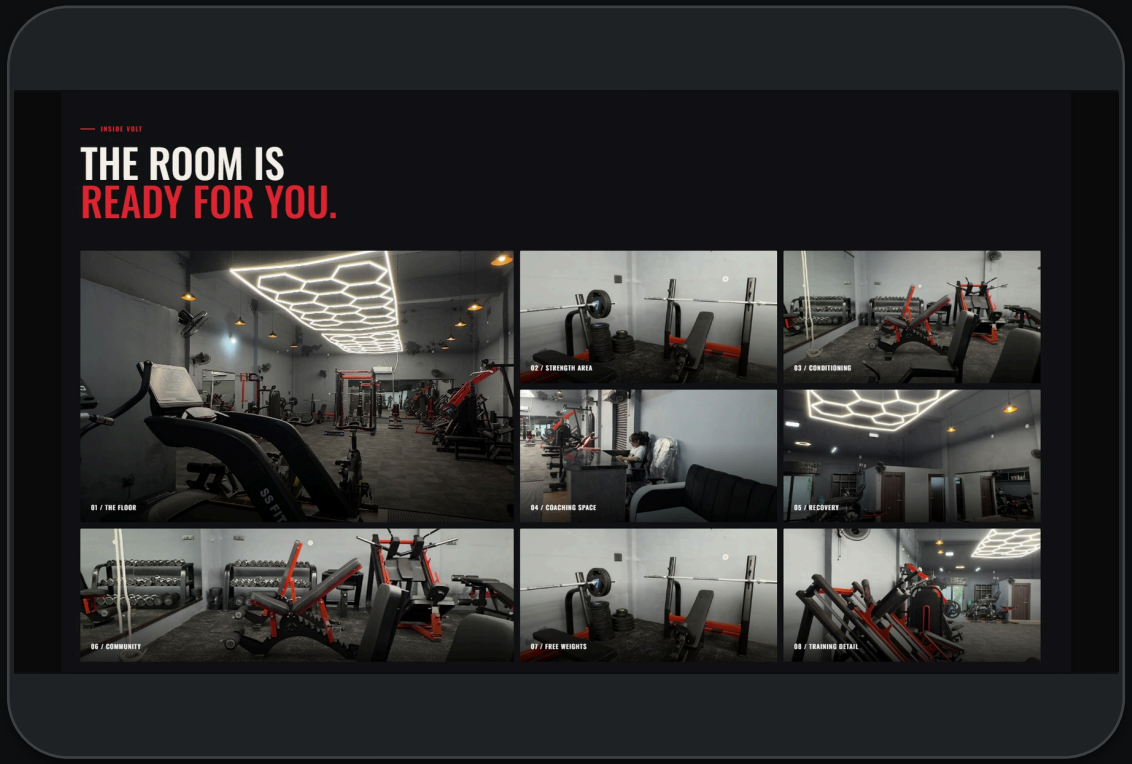

One large feature image is balanced by smaller tiles.

SELECTABLE IMAGES

Visitors can open selected photos in a larger view.

INTERACTION

JavaScript handles the lightbox behaviour.

HTML: image containers · controls

CSS: grid · overlay styling

JS: lightbox interaction

Coach & Trainer Profiles

Profiles communicate coaching specialisations and trainer identity.

SPECIALISATIONS

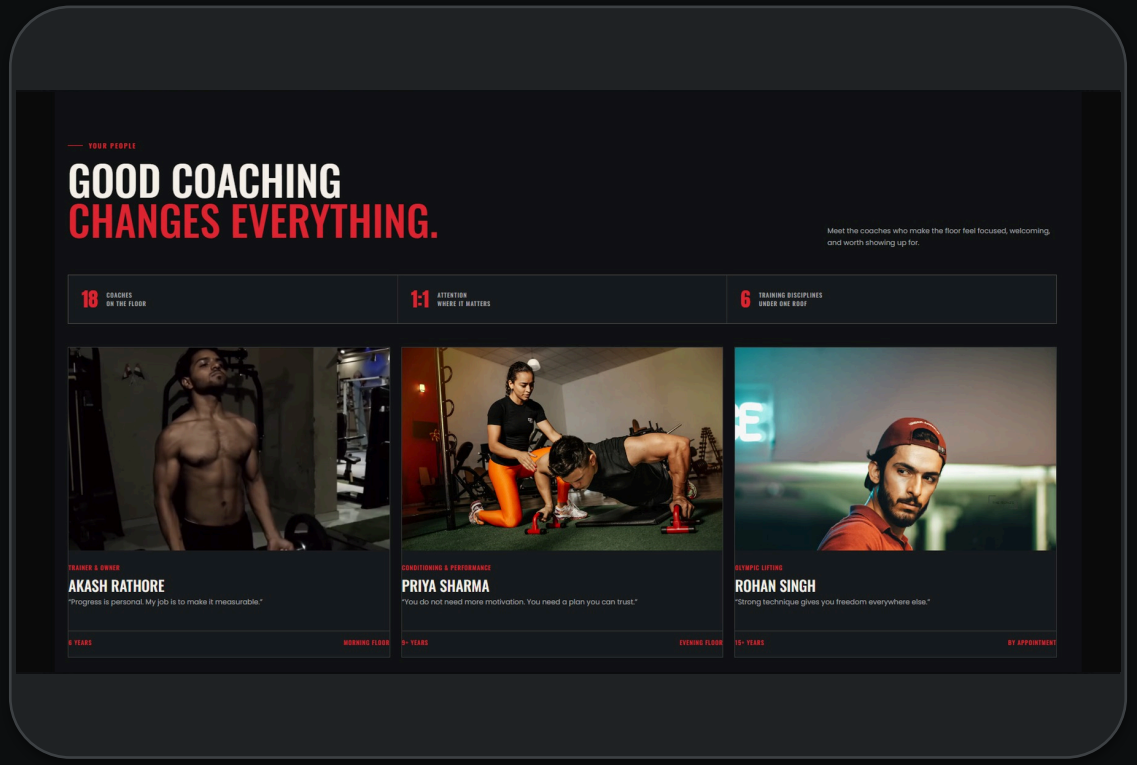

Show the coaching discipline for each profile.

EXPERIENCE

Labels and short descriptions add context.

SCOPE NOTE

Profiles are website content, not an admin-managed staff module.

HTML: cards · images · headings

CSS: grid · image treatment

Member Reviews & Feedback

Visitors can read member feedback and submit a star-rated review.

REVIEW CAROUSEL

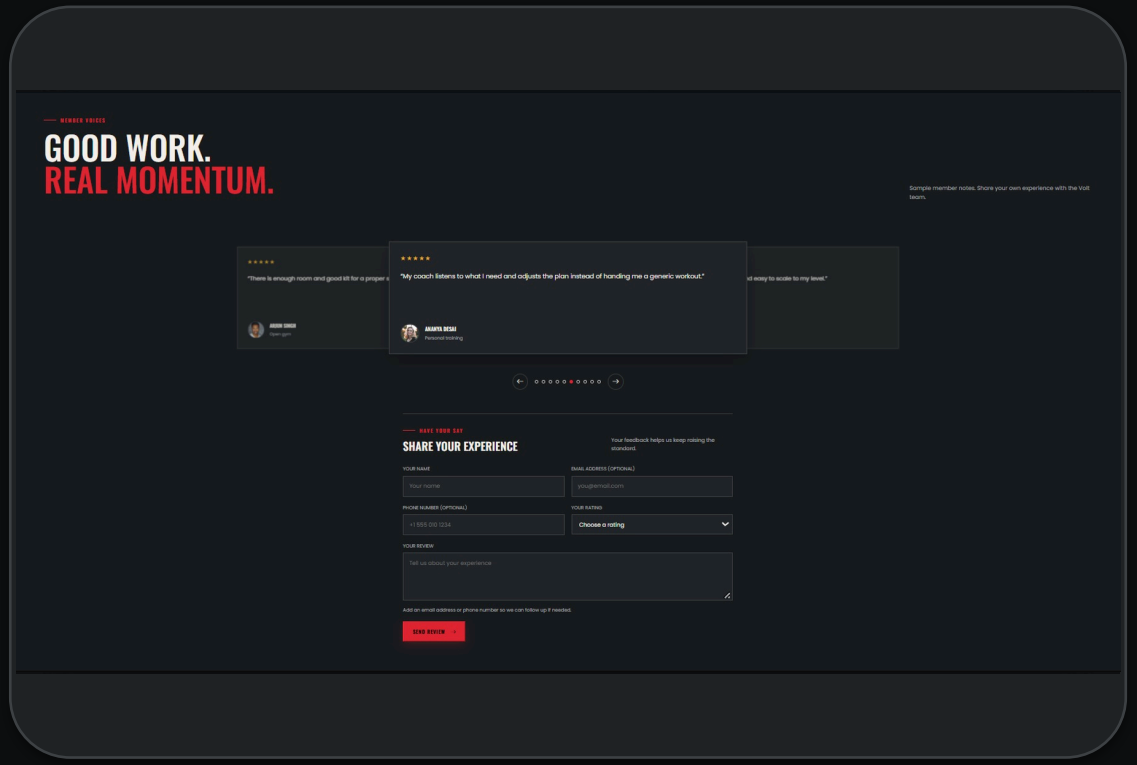

Previous/next controls and pagination navigate quotes.

REVIEW FORM

Collects name, a 1–5 star rating and feedback.

BACKEND LINK

Accepted reviews are stored for staff review.

HTML: form · inputs · buttons

CSS: cards · states

JS: carousel · validation

Reviews — Backend

From the visitor’s form to a saved review.

01
FORM
Name, rating, message

→

02
PHP API
Checks fields and rating range

→

03
PDO + SQL
Prepared insert into MySQL

→

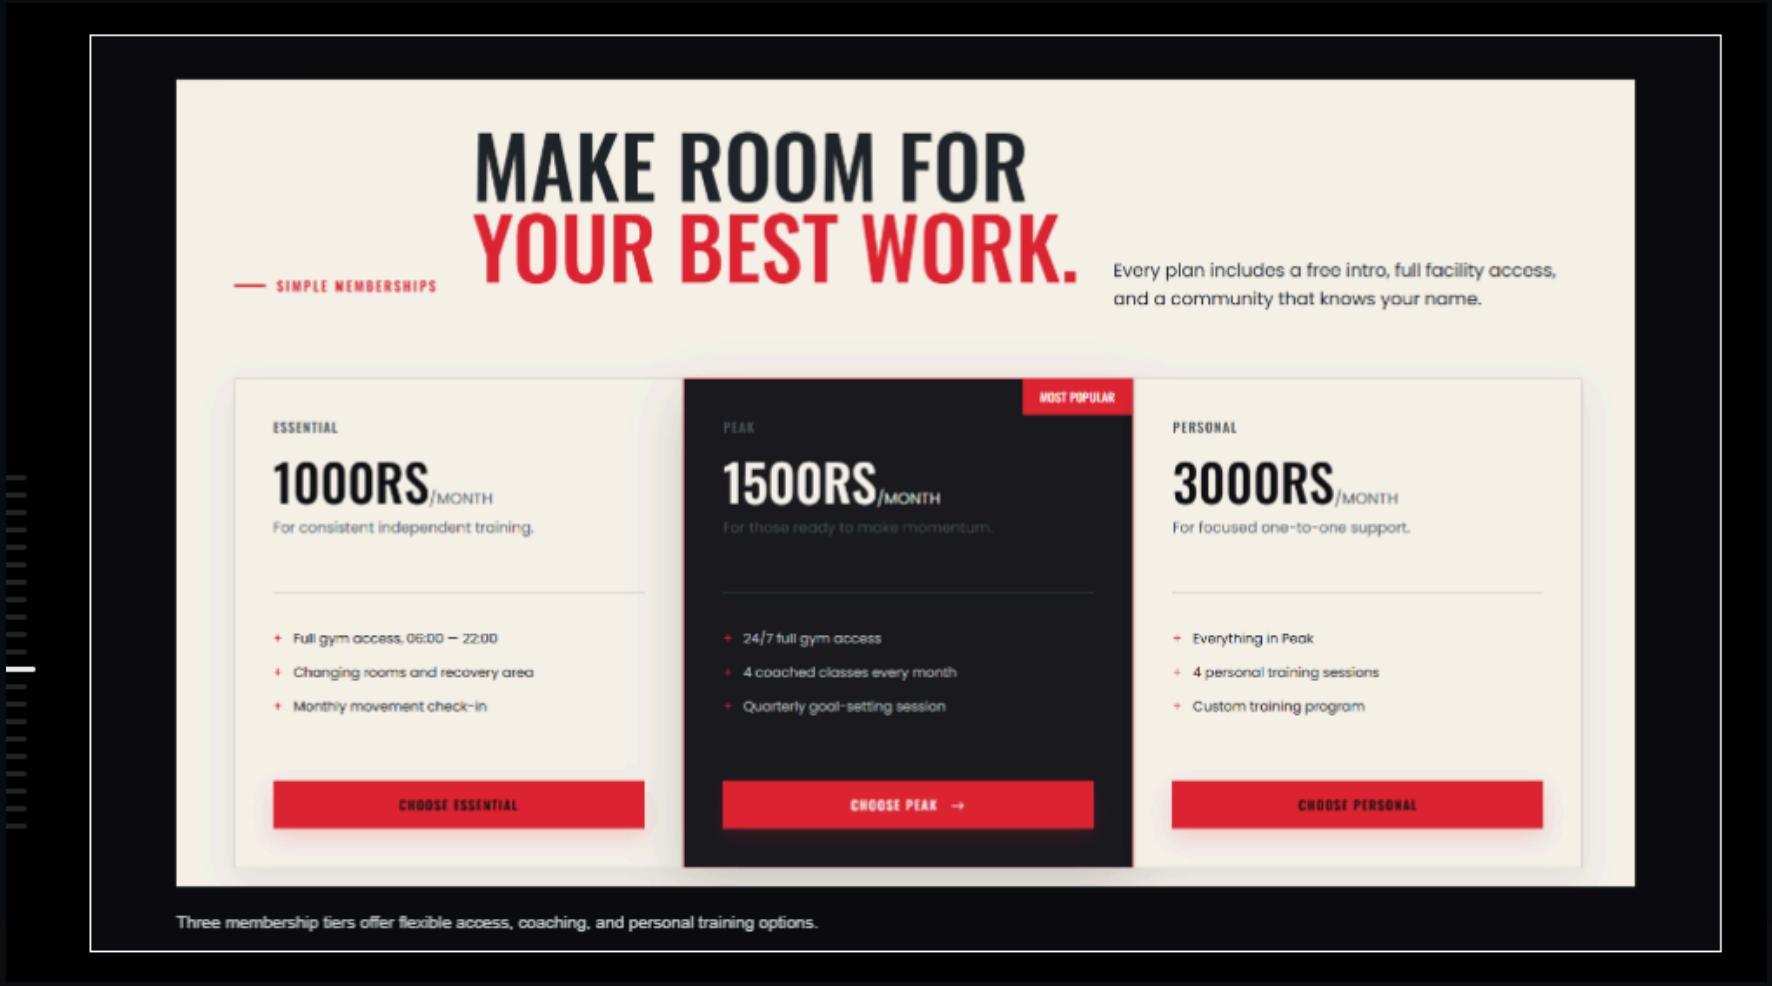

04
ADMIN INBOX
Staff reviews submission

`php/api.php` `VALIDATION` `PDO PREPARED SQL` `MYSQL`

Rating is limited to 1–5 stars.

Membership Plans

The website presents options clearly; it does not process payments.

Three membership tiers offer flexible access, coaching, and personal training options.

Contact & Enquiry Form

Visitors can share contact details and request a visit.

CONTACT DETAILS

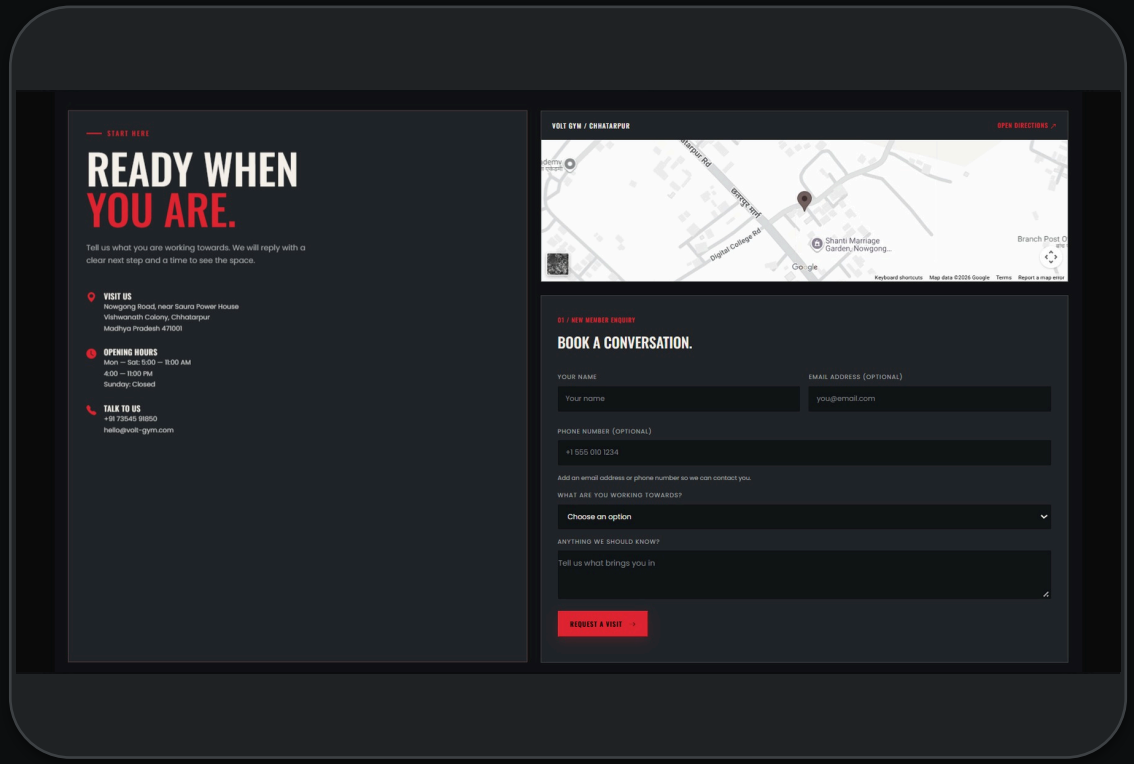

Address, opening hours, phone and email are shown together.

FORM FIELDS

Name, contact method, training goal and optional message.

SUBMISSION

The form sends a request to the PHP API.

HTML: form · input · button

JS: form interaction

PHP: api.php

Enquiry — Backend

A simple pipeline validates and stores each accepted enquiry.

01
REQUEST
Form sends submitted data

→

02
VALIDATE
Check required fields and contact details

→

03
PERSIST
PDO prepared insert to MySQL

→

04
RESPOND
Return a status and message

POST JSON | PHP VALIDATION | PDO PREPARED SQL | MYSQL

Staff can then review the record in the inbox.

Light/Dark Mode & Responsive Design

JavaScript switches the theme; CSS changes the colours; the choice is saved.

HOW THE THEME TOGGLE WORKS

One click switches the site theme; the saved preference is restored on the next visit.

01

USER CLICKS

The sun/moon button in the header

→

02

JAVASCRIPT

Toggles the theme class on the page

→

03

CSS UPDATES

Colors and surfaces switch to light/dark

→

04

PREFERENCE SAVED

localStorage keeps the chosen theme

RESULT: Consistent theme across pages · Preference persists after refresh

Admin Dashboard

A staff-only inbox brings enquiries and reviews into one place.

OVERVIEW

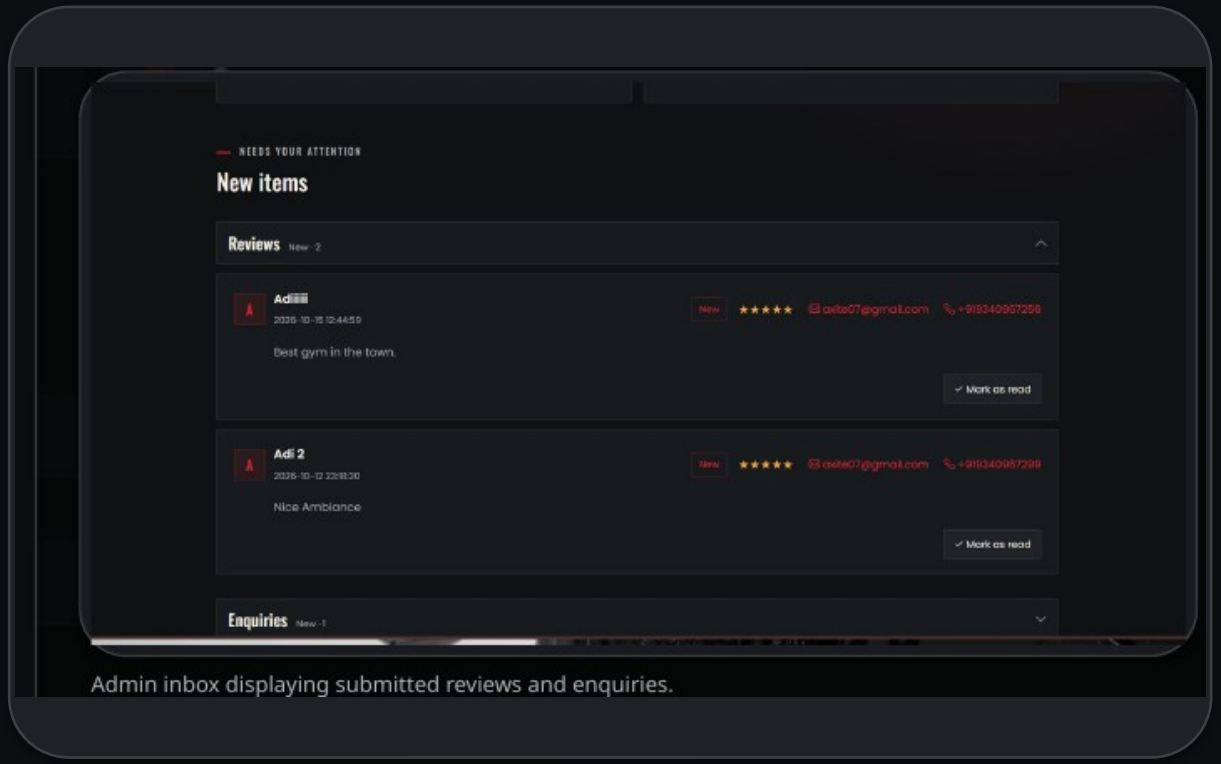

Shows total review and enquiry counts.

NEW ITEMS

Incoming submissions are grouped for attention.

READ STATUS

Staff can mark items as read and track reviewed records.

Admin inbox displaying submitted reviews and enquiries.

PHP: admin.php | **SESSIONS** | **MYSQL READS**

Admin Backend & Security

Only authenticated staff should be able to manage submissions.

LOGIN

Checks the entered password against the stored password hash.

SESSION

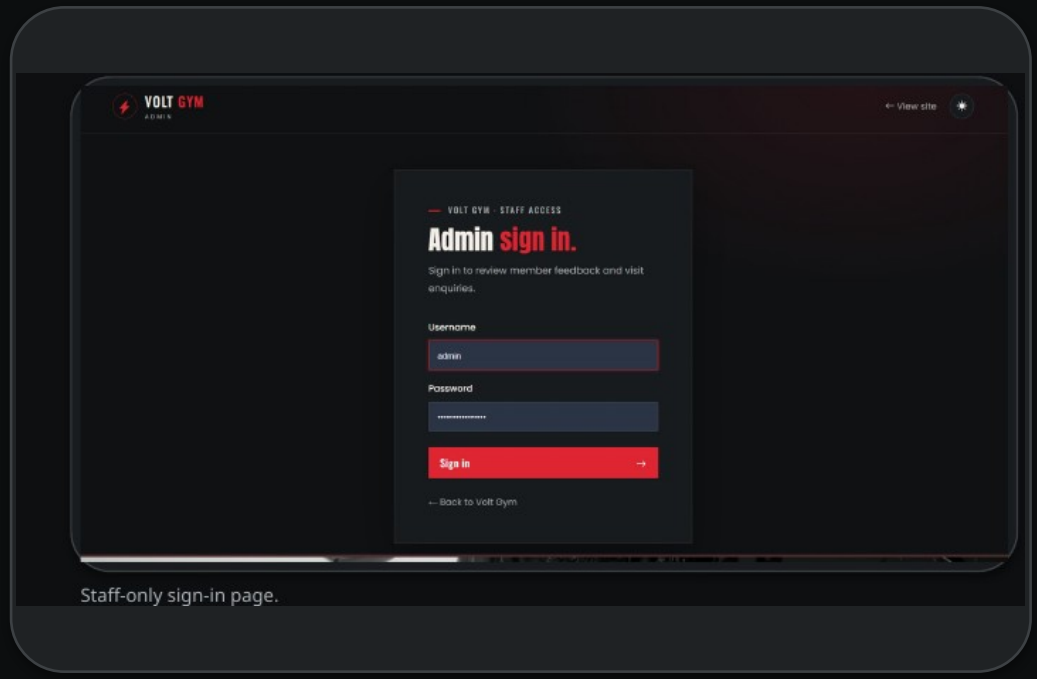

Session authentication protects dashboard actions.

CSRF PROTECTION

POST actions use a server-validated session token.

SAFER OUTPUT

Output escaping helps prevent injected HTML from being rendered.

Staff-only sign-in page.

`password_verify()` `PHP SESSION` `CSRF TOKEN`

Database & Technology Stack

The public interface and the PHP/MySQL backend have separate responsibilities.

inquiries

id · name · email · phone
goal · message · created_at

reviews

id · name · email · phone
rating · message · created_at

admins

id · username
password_hash · created_at

admin_read_status

submission_type · submission_id
read_at

TECH STACK

HTML5
Page structure

CSS3
Layout, themes, effects

Vanilla JS
Slider, lightbox, interactions

Bootstrap
CSS utilities + icons

PHP
API + admin dashboard

MySQL + PDO
Persistent data + prepared queries

XAMPP
Local PHP/MySQL setup

GitHub Actions
Static frontend deployment

Challenges & Solutions

Key implementation decisions that connect the interface to real workflows.

FORM INPUTS	Validate required fields, formats, rating range and message length.
DATABASE SAFETY	Use PDO prepared statements instead of joining user input into SQL.
ADMIN ACCESS	Protect the dashboard with password verification, sessions and CSRF checks.
DEPLOYMENT LIMIT	GitHub Pages hosts static files; PHP/MySQL needs a PHP-capable server.

Future Scope

Planned enhancements to make Volt Gym more capable and convenient.

01 PAYMENT GATEWAY

Enable secure online membership payments.

02 COACH MANAGEMENT

Add and remove coach profiles directly from the admin panel.

03 AI BMI CALCULATOR

Integrate AI-powered BMI calculation and guidance.

04 AI DIET & WORKOUT PLANNER

Generate personalized diet and workout plans with AI.

THANK YOU

Thank you for your time and consideration.
